Texas Aerospace and Aviation Companies

A list of the major aerospace and aviation industry codes from the North American Industry Classification System (NAICS) – which has replaced the Standard Industrial Classification (SIC) system – follows. This industry code list has mainly been adopted from the Commission on the Future of the United States Aerospace Industry’s October 2002 *U.S. Aerospace and Aviation Industry: A State by State Analysis* report. Most of the industry codes fall into NAICS 33+, which are manufacturing breakouts. Aerospace and aviation industry manufacturing covers everything from aircraft engines to handgliders to guided missiles and space vehicles. NAICS 481: Air Transportation includes the air transport of passengers and cargo. NAICS 4881: Support Activities for Air Transportation includes airport operations, repairs and services, and air traffic control. NAICS 517410: Satellite Telecommunications includes establishments providing telecommunications via a system of satellites or reselling satellite telecommunications. NAICS 54133: Engineering Services is a broad, multi-industry area, and only the aerospace portion is relevant. NAICS 927: Space Research and Technology is comprised of government or quasi-government research establishments.
